

***Arctostaphylos manzanita* c. Parry (Ericaceae)**

Dr. Robert Thomas and Margaret Orr
© 1999 California Academy of Sciences
(1 of 9)

Common names: Common manzanita [[U.S. Forest Service 1997](#)], common manzanita [[Hrusa 2001](#)], whiteleaf manzanita [[PLANTS 2001](#)]

Related names: See also the following taxa contained within *Arctostaphylos manzanita*:

- [Arctostaphylos manzanita ssp. elegans](#)
- [Arctostaphylos manzanita ssp. glaucescens](#)
- [Arctostaphylos manzanita ssp. laevigata](#)
- [Arctostaphylos manzanita ssp. manzanita](#)
- [Arctostaphylos manzanita ssp. roofii](#)
- [Arctostaphylos manzanita ssp. wieslanderii](#)

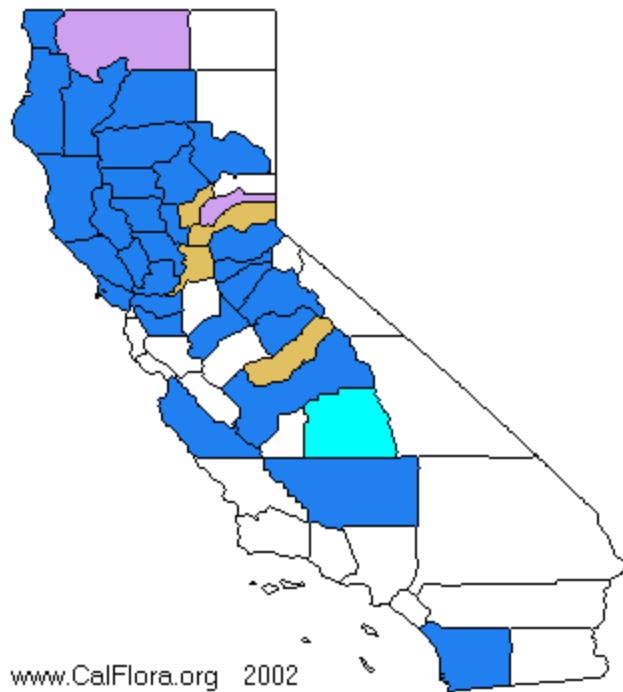

Plant communities: Chaparral, Foothill Woodland, Northern Oak Woodland, Yellow Pine Forest [[Lum/Walker](#), [CNPS](#)]

Habitat: described by Walker and/or CNPS as occurring under dry conditions in canyon and slope habitats [[Walker](#) and/or [CNPS Inventory 1994](#)]

Elevation: between 0 and 4921 feet [[Hickman 1993](#)].

Arctostaphylos manzanita, a dicot in the family Ericaceae, is a shrub that is **native** to California [[Hrusa](#)] and is endemic (limited) to California alone [[Lum/Walker](#) and [Hickman](#)].

Distribution in California based on 714 Observations contributed to the CalFlora Occurrence Library

Shaded counties indicate at least one observation within the county.

Blue indicates that there is a specimen from this county in a participating herbarium. Specimens have the highest reliability of identification.

Light Blue indicates a documented observation that is vouchered or confirmed by an expert.

Lavender indicates other reported observations that are unvouchered.

Mustard Yellow indicates the county falls within the described species range published in botanical literature
