The Sudden Oak Death pathogen (Phytophthora ramorum) causes foliar blight on nursery stock.

If you see these symptoms on...

**Camellias:**
- Wet or “water-soaked” diseased areas
- Dark “halo” around diseased areas

**Rhododendrons:**
- Diffused margins of diseased areas
- Often along mid-vein of leaves

**Pieris:**
- Often at terminal tips of leaflets
- Twig die-back

Please contact your local County Department of Agriculture.
