(1 of 15)

Common names: salmon berry [[Hrusa 2001](#)], salmonberry [[PLANTS 2001](#)]

Plant communities: Redwood Forest, Mixed Evergreen Forest [[Lum/Walker, CNPS](#)]

Wetlands: equally likely to occur in wetlands or non wetlands [[U.S. Fish & Wildlife Svc.](#)]

Elevation: between 0 and 4593 feet [[Hickman 1993](#)].

Rubus spectabilis, a dicot in the family Rosaceae, is a shrub that is **native** to California [[Hrusa](#)] and is also found outside of California, but is confined to western North America [[Lum/Walker](#)].

Distribution in California based on 119 Observations contributed to the CalFlora Occurrence Library

Shaded counties indicate at least one observation within the county.

Blue indicates that there is a specimen from this county in a participating herbarium. Specimens have the highest reliability of identification.

Light Blue indicates a documented observation that is vouchered or confirmed by an expert.

Lavender indicates other reported observations that are unvouchered.

Mustard Yellow indicates the county falls within the described species range published in botanical literature
