

Alan Kanaskie is the Forest Pathologist for the Oregon Department of Forestry in Salem. He has more than 30 years of experience in the Western US, most of those with ODF. He previously worked for Weyerhaeuser Forestry Research and the USDA Forest Service. He has a BS in biology from Lebanon Valley College and a Masters degree in Forest Pathology from the Duke University School of Forestry and Environmental Studies. His main interest is detection and management of forest diseases, especially root diseases, but with recent emphasis on Swiss needle cast and sudden oak death.
